

Murphy Soft Wipes®

Murphy Soft Wipes® are a unique large wet wipe formulated to clean dust, dirt and grime and reveal wood's natural beauty. The practical peel-and-reseal package helps prevent the wipes from drying out. With no chemicals or solvents harmful to wood surfaces, Murphy Soft Wipes are safe for use throughout the house, including:

- Finished wood furniture
- Wood trims
- Kitchen cabinets
- Kitchen tables and chairs
- Wooden blinds
- Doors
- Painted wood surfaces
- Bookcases

How to Use Murphy Soft Wipes:

Open the Murphy Soft Wipes pouch by peeling back the seal. Use a fresh disposable wipe on the desired surface. Refold the wipe as it becomes soiled. Let the cleaned surface air-dry. Dispose of the wipe in a trash can, not down the toilet. Reseal the pouch to keep unused wipes clean and moist between uses.

Helpful Hints:

- Start with large wood surfaces first, moving towards smaller surfaces last.
- When using on unknown finishes, test an inconspicuous area with plain water.
- Discoloration or flaking indicates the wood may need refinishing.
- Do not use Murphy Soft Wipes on unfinished wood.
- Murphy Soft Wipes clean away wax build-up, so if you like, reapply wax after using a wipe.

Use these wood care tips from the Murphy's wood experts, and keep your wood looking its best.

Exposure to sunlight can speed the aging of wood. To prevent UV exposure from fading wood's natural color, consider installing curtains or blinds to block direct sunlight.

Use coasters to protect wood-topped tables from water rings. For a more permanent water-ring solution, ask your hardware store to cut a glass or Plexiglas pane to fit your wooden table top.

Remember, wood is dynamic and will expand and contract with extreme fluctuations of humidity and temperature. Avoid extremes of hot, cold and wet to prevent cracking of solid-wood furniture
